

WEEKLY HARVEST REPORT

Week ending 8 January 2017

South Australian total	Week ending 8 Jan 2017*	Total 2016/17 harvest**
	790,579 tonnes	8,210,598 tonnes

South Australian overview

Harvest pace remains steady across the state with more than 790,000 tonnes of grain received last week.

This helped bring the total amount of grain received this season to 8.2 million tonnes.

While harvest is nearly complete in the Western region and well-progressed in the Central region, the Eastern region is still in the peak of harvest.

Viterra's 2017 shipping program has commenced with more than 120,000 tonnes of grain exported from Inner Harbour, Outer Harbor and Port Giles last week.

Western region receivals	Week ending 8 Jan 2017*	Total 2016/17 harvest**
	38,670 tonnes	3,161,588 tonnes

Grain deliveries in the Western region have slowed considerably in the past week with just over 38,000 tonnes of grain received into the Viterra system.

Central region receivals	Week ending 8 Jan 2017*	Total 2016/17 harvest**
	529,675 tonnes	3,569,421 tonnes

Receivals in the Central region remain steady with just under 530,000 tonnes of grain delivered to Viterra sites.

Ardrossan broke its season record on 6 January with more than 436,000 tonnes of grain received so far this harvest.

Eastern region (incl. ADE) receivals	Week ending 8 Jan 2017*	Total 2016/17 harvest**
	222,234 tonnes	1,479,589 tonnes

In the Eastern region, grain deliveries are flowing with over 222,000 tonnes of grain received into the system last week.

On 2 January, Viterra's Taillem Bend and Bordertown sites both broke season records. Taillem Bend has received more than 445,000 tonnes of grain so far this season and Bordertown has now taken in over 30,000 tonnes of grain for the harvest period.

Viterra's Wolseley site broke its daily receival record for the second time this harvest, taking in 8,528 tonnes of grain on 4 January. The site is also building additional storage to accommodate the large harvest.
