

2019/20 harvest Malt barley, pea and faba bean segregations

Central region

Viterra has released its preliminary segregation plan for malt barley, peas and faba beans for the 2019/20 harvest to help growers plan for the season. This comes ahead of the preliminary segregation plan for all commodities.

Viterra has made changes to its segregations based on grower planting trends, operational requirements and to ensure we can provide an efficient service to growers for the upcoming harvest.

The preliminary segregation plan is subject to change based on further feedback from growers and seasonal conditions.

Port Giles	●					●
Port Pirie	●	●	●	●	●	●
Roseworthy		TBA				
Snowtown	●					●
Wallaroo	●					●

Viterra has made changes to malt barley segregation options based on growers' planting trends and end-use customer feedback.

- The number of Spartacus, Compass and Planet segregations has increased as a result of grower feedback that plantings are expected to increase.
- Commander, Latrobe and Scope segregations will be available at less sites due to reduced plantings of those varieties.
- Hindmarsh will be segregated as feed due to a continuing decline in planting.

Viterra is consolidating storage options for peas and faba beans to ensure more suitable storage facilities for handling the commodities. Segregations for pea and faba beans this harvest include:

- Segregations for PEAK pea and FIESTA faba bean varieties will be available at Gladstone instead of Port Pirie.
- On the Yorke Peninsula, Wallaroo and Ardrossan will not be receiving PEAK and FIESTA. Balaklava is the alternate delivery site for PEAK and FIESTA.
- In the Lower North area Owen will not be receiving FIESTA and Tarlee will not be receiving PEAS and PEAK. Mallala will receive PEAK and Tarlee will receive FIESTA.
- Due to declining receivals, PEAS pea segregations will not be available. As an alternative, growers can sell PEAS with 'Buyers Call' contracts direct with buyers.

If you have any questions about delivery options, please contact:
